Dr. Don Huber, Professor Emeritus of Plant Pathology at Purdue University, holds B.S. and M.S. degrees from the University of Idaho, a Ph-D from Michigan State University, and is a graduate of the US Army Command & General Staff College and Industrial College of the Armed Forces. He was Cereal Pathologist at the University of Idaho for 8 years before joining the Department of Botany & Plant Pathology at Purdue University in 1971. His agricultural research the past 55 years has focused on the epidemiology and control of soilborne plant pathogens with emphasis on microbial ecology, cultural and biological controls, nutrient-disease interactions, pesticide-disease interactions and techniques for rapid microbial identification. On today's episode of Bulletproof Radio, Dave and Dr. Huber talk about glyphosates, GMOs, natural mycotoxins, fertility, concerns for the global population, biological system and more. Enjoy the show
