

Dear Christian community,

Currently there is a blitz of dramatic, disturbing articles defaming people who are both male and female. The articles appear intended to inflame and mislead Christians. Many of these articles describe flamboyant drag queen performers and cross dressers who are "cis" (not even intersex/transgender/hermaphrodite).

Typically, most true intersex/transgender/hermaphrodite people do not dress or behave to attract attention or real danger to themselves. They wish to blend in and pass unnoticed for their own safety and hate to be "clocked".

Be suspicious of articles designed to incite anger against this group of usually quiet environmentally gender altered people. There is an all-out effort to tempt Christians to abuse them specifically and create murderous policies against them which may eventually turn back on Christians as a genocidal community. The far left is pimping them because they need help. For this reason, many gender altered people fear and learn to hate Christians as they do ISIS. But many of the same actually want Christ and they have a high rate of suicide.

Jesus clearly instructed us to love our neighbors, bind up their wounds, and carry them to the Inn. Some of them might turn out to be our own children or peers. A number are Christians, driven out of their homes and churches.

Isaiah 56 gives instructions for the foreigner, eunuch and outcast to live for God and gave them a special place within the walls of His temple. Christians can help them live moral lives of significance and honor by reaching out to them in their loneliness and distress, learning their complicated dynamics, and using proper pronouns. NEVER EVER drive them far from Jesus by intentionally calling them by their "dead" name. How can we expect to win someone for Christ if we refuse to call them by their name? Even God expects us to use proper pronouns for Him, and He says "I am Who I am." These people are no different. Neither are any of the rest of us.

Ditching the endocrine disrupting chemicals and other toxins responsible for most of these alterations might be a very good idea also. They can also cause osteoporosis, breast cancer, non hodgkins lymphoma and multitudes of other nasty glandular, neurological (ie, parkinsons,etc), autoimmune and cancer related messes. Go to [www.pubmed.gov](http://www.pubmed.gov) and search "endocrine disruption". Over 6,000 hits!

**P.S. The drag queens and cross dressers need Christ too.**
