

Gender Alteration Resources

Compiled by Mrs. Olive Kaiser with scientific support from Dr. Warren Porter, Dr. Fred Vom Saal, and others

This is a work in progress. More information is welcome on any related topic.

Please contact Mrs. Olive Kaiser jka8168@gmail.com 630-808-2079 cell, text

This project goal is to promote understanding and awareness of gender alteration, its less known environmental factors, and challenges, particularly in faith based communities, and to uphold God's glory and bless others.

TYPICAL USES OF TERMS – Definitions and uses can vary

Hermaphrodite – a person with full male and female anatomy. This does not refer to sexual attraction or behavior.

Intersex – a newer term for hermaphrodite. It covers a broader mix of anatomical alterations. Most intersex people identify either male or female but possess a variety of characteristics of both genders. Not an “attraction” term.

Transgender.- Likely a subset of “intersex”. Literally means “across gender” – describes someone who possesses an outwardly anatomical male or female body, but whose anatomical brain and identity is opposite. There are disrupted developmental processes that can account for this dissonance between body anatomy and brain anatomy/function and likely there is more to discover. This category is often accused of mental illness or demon possession due to inadequate testing methods. “Transgender” is brain vs body anatomy and function, not attraction.

Gender fluid – a difficult transgender category in which traditionally stable functions become dynamic and the person's core identity changes or is fluid between male and female. It is not hard to suspect that an environmental influence (chemical or toxin) is responsible for this category of gender alteration.

Agender – a transgender category in which the person does not identify male or female. Gender specific characteristics such as breasts may be very distressing to the person. Non binary is similar.

Same sex attraction or homosexual attraction – A person whose brain identity is in sync with their anatomy but their brain based “attraction” anatomy is to their same sex/gender, i.e., male attracted to male, or female attracted to female. Same sex attraction is not behavior, and same sex behavior should never be assumed if there is same sex attraction. Environmental chemicals have been shown to interfere with male to female attraction and create homosexual attractions in laboratory animals and in the wild.

Same sex behavior – commonly termed homosexuality, gay (male) or lesbian (female) is sexual behavior between persons of the same sex.

Cis gender – Typical, fully male and female persons in every category, i.e., DNA, hormones, anatomy, identity, and attractions, and to a lesser degree, role.

Cross dresser - This is a cis gender male or female, usually male, who for entertainment dresses in opposite gender persona and parades usually in a distant neighborhood. These people are happy in their true cis gender, and if they run into trouble they run back home to their suits and ties. They have no interest putting up with the social rejection endured by true gender altered people. However it is not unusual for true gender altered people to first believe they are cross dressers and then realize they are truly gender altered. Truly gender altered people as children and adults both often privately cross dress to their true gender in an effort to relieve their dysphoria, sometimes for years, before they conclude they are actually intersex/transgender. A quote in the intersex community is that the difference between a cross dresser and intersex/transgender is about 5 years (or 10 or ???)

Drag Queen – Drag queens are cross dressers who perform onstage for pay.

LGBTQIA – **Lesbian**= female to female attraction **Gay**= male to male attraction, **Bisexual**= both male and female attraction, **Transgender** = Opposite brain anatomy/identity to sexual anatomy, **Questioning** is just that, **Intersex**= a mix of male and female characteristics, formerly termed hermaphrodite, **Agender** =Brain anatomy/identity is neither male nor female.

One page Cliff's Notes version of gender alteration resources for lay persons

Here are starter resources on 3 known causes of gender alteration. This list is by no means exhaustive.

1. Endocrine disrupting chemicals

Below is a key lecture by Dr. Warren Porter, U of Wisconsin, Madison. It is probably the best one lecture I have found for basic information on the effects of chemicals on our bodies and our children's development. It helps for lay persons to print the PowerPoint and sit down to listen with the slides in front of you. Later the lecture can be replayed over and over while in the kitchen, car, etc. until the more sciencey points are easier to understand.

- a. Dr. Warren Porter - University of Wisconsin, Madison professor of Environmental Toxicology/zoologist
http://www.theglutensyndrome.net/MOSES15-Porter_Benbrook-GMOWhatDoWeKnowPlus2010Q&AFinal.mp3
- b. Here's the PowerPoint for the above lecture - http://theglutensyndrome.net/Risk_Management-15.pdf
- c. Dr. Fred Vom Saal, plastics - www.pbs.org/wgbh/pages/frontline/shows/nature/interviews/vomsaal.html

Here is Dr. Vom Saal's call for a new risk assessment of BPA, see page 14 for methods corporate scientists used to hide the estrogenic effects of their chemicals, including using a special strain of rat (the Charles River Sprague Dawley rats) that was bred to be insensitive to the effects of the chemicals studied.
www.theglutensyndrome.net/VomSaal_RiskAssessment_ehp0113-000926.pdf

Endocrine disrupting chemicals include many pesticides and herbicides including RoundUp, atrazine, dioxins, DDT, many plastic additives including BPA, and BPA substitutes BPS, BPF and similar, phthalates, polycarbonates, artificial fragrances, sunscreens, dry cleaning chemicals, flame retardants, chlorine, fluoride, mercury and more.

2. Chimerism

Chimerism may occur when male/female twins are conceived and one dies early on the pregnancy. The living opposite gender twin may absorb and incorporate DNA from its deceased sibling. This may but not necessarily, cause the living twin to be both male and female. Here is a documentary on chimerism, (2 cases in this documentary did not cause intersex in the living twin. In the third case it did cause a child to be a chimeric hermaphrodite child) Also Sesquizygotic twins are a published phenomenon (NEJM)
<https://www.youtube.com/watch?v=dFf5gKiTGlo> <https://www.nejm.org/doi/10.1056/NEJMoa1701313>

3. Aborted fetal cells in vaccines and insertional mutagenesis

A possible connection between gender identity disorder and aborted opposite gender fetal DNA in vaccines has been raised by Marcella Piper-Terry, a vaccine investigator and autism mom. (She brings up possible gender identity disorder at the end of this short clip.) <https://www.youtube.com/watch?v=RU2BDZL3OFY&t=14s>
Her website is vaxtruth.org and her video <http://vaxtruth.org/2017/06/pro-life-you-cant-be-pro-vaccine/> contains research in the PowerPoint that suggests this concern.

The Transgender Handout

Finally here is a "work in progress" lay collection of various resources to help understand gender alteration, gender altered people, and their unique and yet increasingly common situations.

<http://theglutensyndrome.net/TransgenderHandout.pdf>.

This sheet is a one page Cliff's Notes resource. The next pages are more detailed Deep Dive resources and links.

Deep Dive Resources for Gender Alteration

It is a pleasure to meet. Here is the resource info I promised. I trust we both will be empowered and encouraged to honor our Savior and support others in a joyful path of salvation and service to Christ, in the midst of a lot of distress and confusion.

Here are books I have found helpful so far.

Our Stolen Future by Theo Colburn <https://endocrinedisruption.org> There are many scientific references in this book.

Toxic Bodies by Nancy Langston Detailing the DES (diethylstilbestrol) disaster many scientific references.

Raising Ryland by Hillary Whittington. The experiences of a couple as they identify and raise a transgender child.

Here is a list of outspoken scientists who are on available on YouTube and there are many others internationally who are reporting similar research. Many scientists either avoid research on this hot potato or do not speak up about the implications.

Dr. Warren Porter – agricultural endocrine disrupting chemicals – U of Wisconsin Madison

Dr. Tyrone Hayes - Atrazine and frogs - Berkeley

Dr. Lou Guillette - alligators in polluted Florida lakes (Lou is now deceased)

Dr. Fred Vom Saal - plastics (Dr. Vom Saal is now retired) – ZU of Missouri Columbia

Dr. Theo Colburn - endocrine disruptors in general – She is now deceased. <https://endocrinedisruption.org>

Dr. Don Huber - agricultural chemicals – Military colonel, professor emeritus Purdue

Dr. Theresa Deisher - aborted fetal cells <https://cogforlife.org/>

Here is the vaccine excipient list. Several vaccines contain various cell lines of aborted human diploid fibroblast fetal cells. (WI-38 is lung tissue dissected from an aborted baby girl, MRC-5 from an aborted baby boy, WALVAX 2 from a 3 month living aborted baby girl) <https://www.cdc.gov/vaccines/pubs/pinkbook/downloads/appendices/b/excipient-table-2.pdf>

Here is an overview - <https://informedchoicewa.com/human-fetal-cells/>

Here is a [pubmed.gov](https://pubmed.ncbi.nlm.nih.gov/) search of simply the words "endocrine disruption". There are over 6 thousand hits. Usually gender alteration appears on the first page of the search.

<https://www.ncbi.nlm.nih.gov/pubmed/?term=endocrine+disruption>

I hope this helps and please feel free to stay in touch with more info to add to the pile, questions, comments, concerns.

Included here is a list of claims, objections and arguments from Christians, mainly for excluding gender altered people from their churches and society. Some objections may be sincerely from ignorance, some fear based, some from misperceptions driven by spooky conspiracy theories or unrealistic pornographic perceptions of the community :-(. Perhaps some are afraid of the reactions of others who have not done their homework... Every concern is Important to address as Christians try to navigate these disturbing developments in the light of the Word of God...

Two churches I know of that have deeply looked into gender alteration are Mark Wingfield's Baptist church, and Stan Mitchell's GracePointe Nashville church. Google them. Both churches address both transgender and same sex attracted people. (They are not the same!) They now better understand the gender altered predicament. I differ with both churches' conclusions on same sex marriage which they subscribe to lifelong marriage commitment only. On the other hand, I and many others support celibacy. However it is fair to hear these Christians' sincere explanations of the Scripture studies they have conducted on marriage. Videos on both sites present their painful and prayerful decisions based on their Biblical studies. I repeat, at this time I am uncomfortable with those interpretations but recognize their sincerity.

These two articles written by a Baptist pastor, Mark Wingfield of Dallas, Texas are landmark..

<https://baptistnews.com/article/seven-things-im-learning-about-transgender-persons/#.WzA9LKdKjIU>

Follow up article: <https://baptistnews.com/article/painful-lessons-from-a-pastors-viral-transgender-post/#.WzA9VKdKjIU>

We can learn the facts and reality of gender alteration and same sex attraction causes and help these people live beloved, accepted lives of significance and honor.

Emails from Dr. Warren Porter, Professor of Zoology and Environmental Toxicology, U of Wisconsin, Madison

Hi Olive,

Here are 4 new papers on Roundup that you should see.

Also will send you a link to an important new video in the next email.

I meant to say it is suspected that there is mammary tissues in male breasts in the Yaqui Valley children, who in puberty have large, very tender breasts. The girls do not have mammary tissue in their breasts, only fat. That was determined by palpitation.

Best wishes, Warren

Dear Olive,

I [am] happy to ... speak about neurological, endocrine and immune effects of pesticides. I would like to show ... some of the massive global changes that are occurring in each of those three categories and also educate ...about the potential threats of genetic and epigenetic modifications due to exposure to them.

The feminization or masculinization that can occur due to the two most common herbicides currently in use, roundup and atrazine, do not result in partial gender changes, but rather the whole body-brain and gonads are influenced by the balance of testosterone to estrogen (see the second slide) which is what can get shifted and lead to changes in sexual behavior. Tyrone Hayes has demonstrated this very well with frogs and Bruce McEwen showed how pseudo-estrogens can alter human sexual preferences in 1987.

Hope this helps you some.

Best, Warren

Hi Olive,

Here are some scientific papers on issues of interest to you. By "whole body/brain and gonadal changes" I was trying to point out that sex hormones affect more than just the gonads' development. The sex center of the brain and its development can also be modified as Tyrone Hayes has shown for frogs and as Bruce McEwen has shown in people with his studies of diethylstilbestrol, a pseudo-estrogen.

Sex hormones are particularly important in affecting embryonic development and they are effective in the parts per trillion-parts per quadrillion range, as Fred Vom Saal has been shown in rats

.I am still teaching and researching full-time. Hope these papers help illustrate the breadth and complexity of low levels of chemicals in our bodies, especially during embryonic development.

Best regards, Warren (wpporter@wisc.edu)

.....
The role of the church?

Dear Olive,

Thank you so much for taking all the time not only in the conversation but in forwarding all of this rich supply of research to me! I hated that I had to leave so abruptly but I suddenly realized how close the time was to my next session. I appreciated your last point and have pondered it since we hung up. So many things change when we know the stories of other people along with their accompanying emotions and pain.

We certainly do have a huge assignment as the church to begins to deal with all of this differently.

Thank you so much for being faithful to the call of God on your life not to overlook what He set before you in the lives of each person dealing with an aspect of this issue.

I look forward to future contacts!

Blessings to you,

XXX

Three Important Points to Be Aware of Regarding Gender Alteration Issues

Hyper machoism

Here is another important piece to understand particularly about Trans women.

In our society butch girls are accepted reasonably well as tomboys. However, effeminate males are despised, abused, even killed.

Therefore an actual boy who is misidentified as a girl will likely behave as a boy but folks will mistakenly consider him to be a female tomboy and he will not necessarily be rejected.

However, children who are actually girls, but who are misidentified as boys are often abused due to their feminine behaviors. They learn to try very very hard to be "boys" to avoid abuse and rejection. They may take on male projects, like fixing up a car, or enter professions that are male dominated such as first responders, carpenters, etc. This is called hyper machoism. Eventually in spite of their best efforts to be boys and men, these girl's true femininity may prevail and they may transition to their true female persona, much to the surprise and puzzlement of those around them, particularly if hyper machoism is a piece of the previous history.

Of course on top of these dynamics is also the truth that all these children are actually both female and male on a spectrum of degree, and it should not be a shock if they display some characteristics of both genders.

Brain anatomy/identity ("I am a girl", or "I am a boy") is a piece of gender that in most cases* is "set in stone". However, it does not always line up with lower body anatomy when disrupted by environmental toxins. We need to let these people tell us who they are!

* The exceptions are "gender fluid" and "gender". Gender fluid is just that. The normally stable core brain anatomy function with regards to identity appears to change, and is very difficult to understand. Even most intersex people do not relate to gender fluid persons. It makes some sense that an environmental influence has affected a normally stable unknown factor to become dynamic.

Agender people are also just that. Their brain anatomy/identity is neither male nor female, and does not match their body's configuration either way. They may be distressed by their gender specific physical characteristics such as breasts. Perhaps they can be accepted for who they are, and leave the gender piece out.

Bathroom issues

Family bathrooms or separate stalls or curtains in locker rooms seem safer for gender altered people since they are often beaten or killed in bathrooms. Most small businesses already have single stall family bathrooms and larger public facilities have the cash to install them or already have done so. This seems to be the best way to meet in the middle for both gender altered people and cis people.

Statistically, the gender altered community does not cause trouble in bathrooms. They do their business quietly and leave before they get hurt, and they worry about the children in their community. Laws allowing gender altered people access to bathrooms according to their brain anatomy/identity are not as dangerous as many fear. These people have been there all along anyway, quietly doing their business, dressed in their core persona, so hopefully unnoticed. "Cis" cross dressers who are there to gawk have been there all along too, also intentionally blending in, so nothing is really changed. If a woman enters a ladies' room and finds a macho cowboy lounging around taking advantage of transgender laws, now she at least knows to leave, or call for help if she suspects mischief. No one sends children into public bathrooms alone anyway, and cell phones may deter some crimes. Centuries ago, bathrooms were not segregated.

Understanding gender altered people and parents of gender altered children. These are important dynamics to grasp.

Unsaved persons in this community may be very very hard to reach. They may have been rejected by churches and equate God with the behavior of Christians whom they perceive wish to passively eliminate them. Therefore many will abuse anyone who mentions God. Christian "Trans" people do not understand why they are so, simply that they are. Knowledge of the chemicals/toxins may explain a lot.

Adults and parents may be incensed by the suggestion that they or their child has a birth defect or is injured. They reason that there are more than 2 "traditional" genders because their chromosomes often vary from XX or XY, ex. XXY. Without knowledge of chemical mutation of genes, or endocrine disruption, they deduce that the God of the Bible is a fraud. ~ Among themselves, transgenders resent intersex/hermaphrodites because they have anatomical proof, which transgenders do not,...yet. ~ Homosexuals accuse transgenders of merely being homosexual but trying to "get out of it" with the Trans label. ~ Trans people resent being included in the LGBTQIA label because their issues are not attraction based. ~ Cis people label transgenders "mentally ill" but may, or may not, accept provable intersex/hermaphrodite people. ~ Therefore to avoid social complications many gender altered people do not divulge their anatomical category amongst themselves or in online forums. Intersex/hermaphrodite people may refer to themselves as "transgender", meaning "across gender", even if they are intersex/hermaphrodite, to avoid accusations of "elitism" from the transgender community.

Common claims, objections and misconceptions of gender altered people, particularly regarding church attendance, worship and communion

Category 1 - “Intersex” people with obvious external or internal anatomical alterations

Claim: Eunuchs of the womb are infertile men, not women, or hermaphrodites with birth or post birth alterations.

Response: God did not leave altered women out. He did not specify qualifications for a eunuch of the womb or eunuchs made by man to be exclusively male. Furthermore, gender altered persons *are* part male, and part female.

Claim: Scripture speaks of women bearing children and men producing seed. Therefore a woman must have a uterus. A man must produce sperm.

Response: No, thanks to sin, some women do not have a uterus (Mullerian agenesis), and some men cannot produce sperm or enough viable sperm. Many do not know they are missing a uterus, or have a low sperm count, or other alterations until reproductive age, but they still identified, behaved and were recognized as male or female from birth. A boy who was castrated in a famous circumcision accident was unwisely raised as a girl and later transitioned back to male and then committed suicide. Nature trumps nurture.

Claim: Gender altered people are automatically wicked perverts and categorically are not Christians.

Response: This impression refers to “transgender”, not intersex and is straight out of choreographed transgender porn played mostly by “cis gender” actors, and also from spooky conspiracy theories, and cross dresser misconceptions. How are Christians so influenced by transgender porn?? “Transgender/“intersex/hermaphrodite” terms do not refer to behavior, they define gender variations. There are gender altered people who are moral Christians. They know they are made in the image of God. Many Christians forget to accept this Scriptural concept.

Claim: Gender altered people should accept their lot in life without gender completion treatment.

Response: Why? No one else does when medical treatment is available to at least relieve suffering and deformity such as cleft palate, heart defects, hormone imbalances, illnesses or injuries. Their desire to live in one persona, the one they “are”, or most closely are in brain anatomy/function is Scriptural. One of many reasons they wish to complete to their true persona is the contempt and scorn they endure from society due to their naturally effeminate or butch behaviors in the wrong gender. Christians punish victims harshly to justify their own disturbed responses.

Claim: There are no intersex people (meaning male/female). They are always one or the other as God made us.

Response: God made us male and female, before sin, but the devil and man’s fraudulent science did not. God foresaw intersex alterations and made provision for the eunuch without further specification. He covered both “in utero” and “post birth” injury. However most gender altered people do identify mostly one gender or the other and wish to live in that persona. This is an inborn Scriptural desire that paradoxically, many Christians reject.

Claim: Do not consider science because science changes. We can only rely on Scripture.

Response: Science is God’s creation in all its detail. Sin *can* change God’s scientific handiwork. Sin and wickedness in corporate chemical labs has done this. To conveniently rule out science is to rule out God’s handiwork. Intersex people are fact. They are observable science, still created by God and Scripture addresses them. Human scientific *theory* does change. Knowledge of the process of intersex injuries does change as more is discovered. Respect for the horrific observable scientific changes that chemicals can cause is Scriptural and needs attention, not avoidance, especially in churches as they serve souls.

Category 2 – “Transgender” i.e. intersex people with opposite brain vs. body anatomy/physiology

Claim: Gender is *only* determined by sex anatomy below the waist. Sexual anatomy below the waist always matches brain gender anatomy/function. If someone claims otherwise they are mentally ill or demon possessed.

Response: Endocrine and DNA disruptors that mix up DNA, hormones, and anatomy have disrupted our previously obvious delivery room indicators, i.e. sexual anatomy. However gender related anatomy/physiology has always been both below the waist (sexual) *and in the anatomy of the brain (gender)*. The pineal, pituitary and hypothalamus glands in the brain are part of gender anatomy and function, although the specific location of gender identity is not known. Particularly in the “female brain/male body” anatomy mismatch there are explanations for this variation. Typical children in utero with male DNA receive a flood of testosterone to their brain when newly formed testicles begin secreting testosterone about week 8. This changes their brain from “pink” to “blue”.* If an estrogen mimic chemical or other interference disrupts that process, the child’s brain or parts of it, may remain “pink”. Many chemicals are estrogen mimics and can interfere with this process. People with female brains and male bodies are found in all walks of life, in many respected, educated positions. They are not mentally ill; their perfectly good female brains just don’t match their body. They are miserable, often abused due to effeminate behaviors and may commit suicide. * See Dobson’s article <https://www.dobsonlibrary.com/resource/article/d582579a-c379-4784-a393-bd6739c8becf>

Objection: Transgender people are demon possessed and are deceived that they are opposite gender.

Response: This simply is not true in most cases. Demon possession is real and anyone can be influenced by a demon but it makes more sense that an environmental factor has caused the child’s brain anatomy and body to develop out of sync. Churches have tortured and abused gender altered children under the mistaken impression of demon possession or harassment. Perhaps the demonic deception is from the church’s chemicals, not the child.

Objection: If children are misgendered at birth they should accept the mistake made by doctors and parents and live out their lives in that gender. (This keeps everyone around them comfortable and them often suicidal.)

Response: This smacks of a spooky conspiracy theory that claims that illuminati and elite people intentionally transgender their children at birth or in the womb as a satanic practice, leaving them both genders or opposite to their cis birth. This supposed practice would be considered evil by most faith based communities and is unlikely as this is a miserable choice. However, when a child truly is misidentified at birth these same religious people try to insist that the kids accept their mistaken gender for life. The misgendered child is considered demon possessed or unworthy of worship to think otherwise. That is double talk. While there may be real ritual wickedness going on in some satanic covens, parents can’t successfully force a child’s gender, although they can time conception to favor one or the other in some cases. A child’s gender identity is outside of the parent’s nurturing control.

Claim: If an intersex person has procreated somehow in one gender or the other, they are that gender regardless of any other factor and must live as such in order to worship God.

Response: This is hard for everyone to perceive. Many gender altered people have previously tried to fulfil societal expectations of marriage and procreation in their mistaken gender, sometimes reluctantly, with help of science. They are still parents of their children, fathers or mothers, but in these cases parenting does not necessarily define their true gender. Scripture does not teach such. A hermaphrodite/eunuch woman who somehow fathered children is still not a man. She is a hermaphrodite woman. To force her to live as a man does

not make her a man, it forces her to transition opposite herself, which is abusive, perverted, and unscriptural. Or vice versa. In today's new world of disrupting chemicals, girls can father children, and boys can bear them.

Objection: Satan's goal is a genderless society, against God's plan for male and female. To agree to "transgender ideology" is to fall in line with Satan's wiles.

Response: Agreed, it is obvious Satan has a genderless society, in mind. He is using chemicals and environmental influences to accomplish this goal and Christians are busy filling in the blanks for him with insistent and indiscriminate use of chemicals. Churches should have nothing to do with these immoral substances and be an example and a haven as possible from them for their babies, children, teens, reproducing parents and older members. They should care for the victims as best as is known and support them to live loved and accepted lives of moral significance and honor among us as stated in Isaiah 56:4, 5.

Note: Endocrine disruption does not just affect gender. It affects all the glands including thyroid, reproduction, bone growth and can cause breast cancer and other neuroendocrine cancers and conditions. Everyone is susceptible to its devastation. Chemicals also mutate genes as in Down's syndrome, gender DNA mix-ups (XXY, XXYX), etc.

Objection: Transgender people are by definition immoral, perverted homosexuals or worse and must be spurned.

Response: This is a misunderstanding of terms. Transgender/intersex people in a variety of ways are both male and female. "Transgender" is a gender category, only. It does not refer to sexual attractions or behaviors. Many moral faithful transgender Christians have been kicked out of their churches due to these false ideas, and why only pick on transgender morals? How about ourselves, our priests, pastors, heterosexual neighbors and coworkers?

Question: If a person is both male and female who should they marry??

Response: For many, perhaps God intends them to be celibate and devote their single lives to his service? Some wonder if they can marry an opposite intersex person? Best for them to ask God if or who they should marry.

Claim: (This claim only regards "same sex attraction", not transgender) "Same sex attraction" is a willful sinful choice and such people must repent and change their attractions to heterosexual.

Response: Sexual attraction is not sexual behavior. They are separate. Many same sex attracted people's inborn *attractions* are disrupted *beyond their control to change them*, often by endocrine disrupting chemicals. Since Scripture seems clear that same sex *behavior* is forbidden under any condition, celibacy may be their only moral option. (Some Bible scholars disagree.) There are cases in which prayer, counselling, detoxing or antiparasitical treatments have helped some reorient to heterosexual attractions. NOTE: Some heterosexual people choose to *behave* homosexually. They must repent of this abomination and return to God's moral order.

Claim: Gender altered young people (hermaphrodite/intersex/transgender) and attraction altered young people (homosexual) should be subjected to "conversion therapy" in order to turn them from their "delusions".

Response: Conversion therapy consists of tying a same sex attracted young person down and forcing them to watch pornographic scenes of homosexual behaviors while torturing them, including cutting, etc. The theory is that they will associate those behaviors with pain. This is abominable and is against the law. Similar torture of transgender children (sometimes in church basements!) is meant to drive out the "demons" that deceived the child. How much better for a church to repent of the unintentionally immoral dana/endocrine disrupting chemicals they

sprayed on the church lawn that the child and his parents before him played on, tracked into their home on their shoes, and may have consumed in the same church basement dining room!

Objection: Gender altered people may not worship due to their persona transition regardless of their morality.

Response: In Isaiah 56:1-8 God repeatedly clearly expects morally living gender altered eunuchs and other nontraditional outcasts to worship Him in His House and within the walls of His temple. He specifically mentions the honored place and everlasting name eunuchs are promised. Gender variant people are all male (and female).

Objection: Many Christians deny that chemical and environmental endocrine disruption explain transgender.

Response: True, and they refuse to hear, or heed, Scripture, science, and warnings. They expose church members and children to endocrine disruptors at social events, and in lawn and facility maintenance, then reject victims of these same chemicals. Church policy influences are reflected in homes, schools, businesses, parks, and on farms. These Christians have said "Raca" to other intelligent brethren who were more careful with chemicals and toxins than themselves. They scornfully trashed the social lives of quiet "luddite, health nut" brethren with disdainful, superior contempt, and drove others from choosing a safer lifestyle. Now that these substances have proven so horrific, it is hard to humbly acknowledge the damage done. God help us repent, apologize, *forgive*, put away these substances, and comfort the injured. God is a God of mercy, grace and forgiveness for us all! We can be grateful.

* **Raca** vain, empty, worthless, only found in [Matthew 5:22](#). The Jews used it as a word of contempt. It is derived from a root meaning "to spit."

Concern: Gender altered people are not welcome in many churches, period.

Opposite concern: The gender and attraction altered community is white to harvest for the gospel, but is not only avoided but publicly attacked by Christians. Paradoxically, great lengths are taken to bring the gospel to criminals, whores, pedophiles, prisoners, homeless drunkards, thieves, pagans, etc. But gender altered or same sex attracted people are unwelcome in many churches, not sought with Good News, and perceived unsafe with kids.

Response: Many in the gender and attraction altered community do wish to attend church, and study the Word. Rejection hurts them extremely and they are already suffering and terribly sensitive. They are often turned away from Christ by the hypocrisy of Christians who reject "them" but then cover the tracks of their own immoral Christian friends. Many gender altered people are bitter to Christians and hard to reach for Christ due to Christian's support of agendas to eliminate them. Churches need to understand these people, and the gender altered need assurance that Jesus Christ is the only One Who will never leave them nor forsake them. They can trust Him. ~ Regarding children, ALL children should be morally scripturally trained and supervised whether in the company of family members, cousins, pastors, priests, in young people's activities, at retreats, camps, conferences, school, etc. Many Christian children and young people have experienced immoral sexual encounters at church and family sponsored events. Dear Lord, help us be vigilant in our protection of those with whom God has entrusted us. Gender altered people contrary to popular misperceptions, do not have a notable record of pedophilia, if at all.

I was glad when they said unto me, "Let us go into the house of the LORD." Psalm 122:1

My House shall be a House FOR ALL PEOPLE! Isaiah 56:8

"Come to Me, all you who are weary and burdened, and I will give you rest. Matthew 11:28-30

This is **My Body**, given for you. This do in remembrance of Me. Luke 22:19

What does God say about people who are both male and female i.e., gender altered, and to the shepherds who minister to the flock.

Matthew 19:12

"For there are eunuchs who were born that way from their mother's womb; and there are eunuchs who were made eunuchs by men; and there are also eunuchs who made themselves eunuchs for the sake of the kingdom of heaven.

Isaiah 56:1-5 King James Version (KJV)

Thus says the Lord:

"Keep justice, and do righteousness,

for soon my salvation will come, and my righteousness be revealed.

2 Blessed is the man who does this, and the son of man who holds it fast, who keeps the Sabbath, not profaning it, and keeps his hand from doing any evil."

3 Let not the **foreigner who has joined himself to the Lord** say,

"The Lord will surely separate me from his people";

and **let not the eunuch say, "Behold, I am a dry tree."**

4 For thus says the Lord:

"To the eunuchs who keep my Sabbaths,

who choose the things that please me and hold fast my covenant,

5 I will give in my house and within my walls a monument and a name better than sons and daughters;

I will give them an everlasting name that shall not be cut off.

6 "And the foreigners who join themselves to the Lord,

to minister to him, to love the name of the Lord, and to be his servants,

everyone who keeps the Sabbath and does not profane it, and holds fast my covenant—

7 these I will bring to my holy mountain, and make them joyful in my house of prayer;

their burnt offerings and their sacrifices will be accepted on my altar;

for my house shall be called a house of prayer for all peoples."

8 The Lord God, who gathers the **outcasts** of Israel, declares,

"I will gather yet others to him besides those already gathered."

What does God say of shepherds without knowledge?

10 His watchmen are blind; they are all **without knowledge**;

11 But they are **shepherds who have no understanding**;

they have all turned to their own way. (Ie self protection and self service).

"Feed my sheep." John 21:17 He will feed his flock like a shepherd. He will gather the lambs in his arm, and carry them in his bosom. Isaiah 40:11 Gender altered people are His sheep and lambs too, still made in His image, worthy of His earthly shepherds' knowledgeable care.

Excerpts with comments from “A Woman’s Brain”
By Dr. James Dobson

BOYS

“The brains of both sexes appear to be “female” until

about the eighth week of gestation,...when a baby boy’s brain is washed by a huge surge of testosterone” (when the newly formed testicles begin secreting that hormone.)

“It is then transformed radically and even takes on a different color. This,...has major implications for future masculine behavior.” It is now a male brain.

GIRLS

“To understand...girls, it is important to understand...a period *between six and thirty months of age* when the ovaries produce huge amounts of estrogen...

Just as testosterone marinates baby boy’s brains in early gestation, estrogen bathes the female brains of girl babies and toddlers.”*

What happens when these crucial testosterone and estrogen brain baths don't happen properly? or are blocked by chemicals that are hormone mimics or that mutate the dna, or ??

Answer - Babies sometimes end up with “pink” brains but “blue” bodies, or vice versa. They are not mentally ill, their brains are fine, but are opposite gender to their bodies. In our toxic, polluted world, we need to let these dear people tell us who they are. We can accept their persons and help them live beloved moral lives of significance and honor.

It helps to understand what might have happened to our gender altered children, especially since the 1940's when DDT, DES, dioxins, and now many others were in use. These include RoundUp, Atrazine, other pesticides and herbicides, phthalates, BPA, BPS, BPF, and other plastic additives, flame retardants, artificial fragrances, sunscreens, mercury, chlorine, soy, dry cleaning chemicals and others.

*This fascinating article in its entirety can be found on Dr. James Dobson's digital library, A Woman's Brain, quoting Dr. LuAnn Brizendine, Yale University

A Woman's Brain - <https://www.dobsonlibrary.com/resource/article/d582579a-c379-4784-a393-bd6739c8becf>

The testosterone surge occurs when the newly developed testicles begin secreting testosterone. Timing is split second and crucial. Estrogenic substances can block or disrupt it.

God made our unborn babies start out with "pink" brains.

At 8 weeks our "intended" baby boy's brains receive
a wash of testosterone that "turns them blue",
boys forever".

If that "boy" wash is blocked or mistimed by tiny amounts of
estrogen mimic chemicals or toxins from our bodies,
our babies' brains stay "pink",
girls forever, with male bodies.

This is one way the "transgender" category of gender
alteration may happen to our babies. Pray!

Why do most Christians categorically demonize
gender injured people with no knowledge of their
individual physical or Spiritual state or lifestyle? But
there is nary a peep from the same Christians decrying
their immoral cis* neighbors or work associates?

Where are the shepherds?

You and I are the laborers.

This suffering field is white to the harvest.
Can Christ send you to that field?

What if He does???

Will you hear them, bind up their wounds, and bring
them to the Inn? Or shut them out, gossip, and
pharisaically shred them to ribbons?

*A cis person is a 100% gender typical male or female

Note: this is not easy. Many are very very sensitive and bitter.

My fellow Christian brothers and sisters,
I see how angry you are, how consumed you are,
how relentless you are, how proud yet myopic you've grown,
how bitter you've become —and it saddens me.
It grieves me deeply to watch your behavior
I'm not sure how you ended up thinking that this was somehow your most noble calling,
or what good you believe you're accomplishing, or exactly what your end game is.
But I hope you hear me because I am telling you in respect and with compassion and in love:
You're wasting daylight here. You're squandering precious breaths.
You're fighting a battle that you can't win and weren't asked to win anyway.
Altering transgenders' identity has already happened.
Our polluted environment has disrupted our DNA and our endocrine systems
Now it's out of your jurisdiction, it's way above your pay grade.
It's far beyond your control, this is God's territory.
And yet my Christian friends, because there is so much that is within your control,
Here is some unsolicited, but hopefully useful advice for you.
With whatever precious, fleeting moments you have left on this planet:
Stop spending time and energy trying to make transgender people "not transgender"—
It isn't going to happen. We are transgender.
This is who we are, still in God's image in Christ
Instead, try spending that time and energy, making:
Hungry people not hungry, hurting people not hurt, lonely people not alone,
Victimized people not victimized, invisible people seen,
Bullied people protected, grieving people comforted,
Gender altered victims live beloved moral lives of significance and honor
Yes, in your churches and your families.
Some of them will be your own children and grandchildren, maybe even your peers.
Those things you actually can accomplish and Jesus did explicitly call you to them.
He states that this is His business and so it should be yours.
Love is the language He commands you to speak.
This is how He said He would determine your love for Him;
Not by the signs you hold, the insults you hurl,
The coldness you deliver, the relationships you sever,
The protests you mount, the havoc you wreak,
The dramatic antitrans Facebook forwards you "like"
Just look around you.
Possibility for goodness is everywhere. It's right in front of you.
You've been given this time, space and your heartbeat, all as priceless gifts.
Don't miss the chance to use them and don't waste them.
There are hopeless situations you can bring Christ into,
Blessings you can provide, people you can care for, paths you can beautifully alter,
Healing you can accomplish, prayers you can answer,
Wounds you can mend, kindnesses you can extend—right now.
The question is, "do you really want any of that?"
Or are you married to this ultimately fruitless cause that is doing nothing real but damage?
The clock is ticking. The sun is fading. Time is wasting.
Jesus is calling, People are waiting.
Christian friends, in Jesus' Name, do something worthy.

Written by a Christian gender altered woman
After multiple vicious attacks from a group of Christians
